

The Sechrist Advantage:

- Sechrist Industries, a US based company, has been in business manufacturing monoplace hyperbaric chambers for over 31 years
- Sechrist has manufactured and sold over three (3) times as many monoplace hyperbaric chambers as all other manufacturers combined
- **UNSURPASSED QUALITY:** Sechrist hyperbaric manufacturing process is vertically integrated, with most precision components machined in Sechrist' on-site machine shop. The Sechrist state-of-the-art facility has complete acrylic casting and finishing capabilities, electromechanical assembly process and its own world class paint shop—**No other US manufacturer can make this claim**
- Sechrist is the recognized worldwide leader in producing clinical hyperbaric chambers with over 80% market share in the US and over 60% in Japan
- Sechrist maintains an inventory policy of keeping a predetermined number of chambers in stock at all times to provide optimal delivery and installation service to its hyperbaric customers
- Sechrist maintains a team of certified technicians for installation and service.
- Sechrist has a 24 – 48 hour emergency response time
- Sechrist has the capability to provide:
 1. Site Visit
 2. Assistance with space planning
 3. Detailed headwall drawings
 4. Resource for hospital facilities staff, oxygen supplier and construction personnel
- Sechrist manufactures the only FDA approved Hyperbaric Ventilator designed exclusively for use with its monoplace chambers
- Sechrist chambers are designed for critical care and monitoring capabilities including respiratory support, IV infusions, ECG and EEG monitoring, blood pressure monitoring (invasive and non-invasive) and transcutaneous oxygen monitoring
- Operator Friendly: Sechrist chambers are designed with ease of use in mind; for operational flexibility, each chamber may be ordered with the control panel located on either side of the chamber thus allowing the same attendant to access two facing control panels on adjacent chambers
